

5111 Gorell Basement Hopper

The 5111 Basement Hopper is an attractive and practical window from Gorell that lets you vent your basement effectively. This window is custom manufactured by Gorell Windows & Doors, which was named ENERGY STAR® Partner of the Year in 2004, 2005 and 2006 by the EPA and Department of Energy.

1. Heavy-duty frames are fused together at the corners at temperatures near 500 degrees F.
2. Soft-white vinyl (clear through) complements practically any architectural style of home.
3. Clear double-insulating glass provides improved thermal performance over standard single-pane glass.
4. Automotive-type glazing provides a super-tight seal.
5. Weather stripping around the sash perimeter provides an uninterrupted weather seal.
6. Insulating foam wrap around the frame significantly reduces the possibility of drafts from between your window and walls.

Note: Maximum size: 36" x 36" Minimum Size: 14 1/2" x 13 3/4"

BASEMENT HOPPER OPTIONS

POLYCARBONATE GLAZING is an attractive option to glass that provides privacy and can be a deterrent to intrusion.

ALMOND COLOR VINYL frame provides a muted accent to the appearance of your home. (Handle is white on almond hopper windows.)

HIGH-PERFORMANCE LOW-E GLASS SYSTEMS with argon or krypton gas fill help keep your home energy bills lower—and comfort levels higher.

INTERNAL GRIDS Finely detailed contoured internal grids provide the look of real divided lites—yet allow for easy window cleaning because they're between the glass panes.

7. Heavy-duty metal latch and keeper provide enhanced security to your home's basement level.

8. Intercept® warm-edge spacer system reduces heat loss through the glass.

9. Unique millwork design on the interior master frame provides the look of hand-crafted molding.
