

Vinyl Siding Institute

Certified Installer Program

Are you looking for a way to enhance your reputation as a contractor and build your vinyl siding installation business? The Vinyl Siding Institute (VSI) sponsors a Certified Installer Program that recognizes experienced installation professionals who demonstrate knowledge of proper vinyl siding application.

All VSI Certified Installer training courses are taught by VSI Certified Trainers. For more information on becoming a Certified Trainer through this program, visit www.vinylsiding.org.

Did you know? Vinyl siding is the only exterior cladding with independently administered installer *and* product certification programs.

How do I become a VSI Certified Installer?

It's easy—all you have to do is verify your installation experience, take a course, then pass an exam that tests your knowledge about vinyl siding installation. Courses are springing up across the United States and Canada, but the easiest way to find a course is to ask your vinyl siding suppliers if they participate in the program.

Once you complete the course and pass the test, you'll receive a card that identifies you as a VSI Certified Installer, and join the elite contractors listed on VSI's registry of Certified Installers. Certification is valid for three years, after which recertification is required.

Why should I become a VSI Certified Installer?

There are many benefits to being certified through VSI's program:

- Independent validation of your skills and knowledge
- Improved credibility as a qualified professional installer
- Higher quality work requiring fewer call-backs
- Increased exposure through our website registry of Certified Installers
- Use of the VSI Certified Installer logo and marketing materials

The Vinyl Siding Institute, Inc., located in Washington, DC, represents manufacturers of vinyl and other polymeric siding and suppliers to the industry. VSI also sponsors the *VSI Vinyl Siding Certification Program* that allows manufacturers to certify, with independent verification, that their products meet or exceed *ASTM D3679*, the recognized standard for vinyl siding quality.
